Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The status of the claims is as follows:

Claims 1, 5, 9, 14, 17, 19, and 20 have been cancelled; and

Claims 2-4, 6-8, 10-13, 15, 16, 18, and 21-23 are herein addressed below.

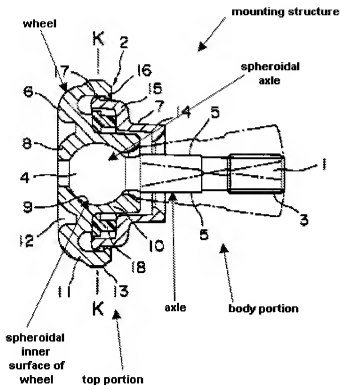

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 2-4, 6-8, 15, and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by JP patent no. 07217310A. JP patent no. 07217310A discloses a wheel guide assembly (see figure below) having a mounting structure (2) having a body portion (5) and a top portion, a wheel (6) having an inner spheroidal surface (9), and a spheroidal head (4) on a top portion of the axle which is seated adjacent the inner spheroidal surface (9) of the wheel (6).

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10-13, 16, 18, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP patent no. 07217310A in view of Gehrke (4,756,640). All of the elements of the instant invention are discussed in detail above except providing a central portion of the wheel with a plurality of fingers that engage the axle. Gehrke

disclose a mounting structure (12) with a central opening for an axle having a plurality of fingers. It would have been obvious to one of ordinary skill in the art at the time of the invention to provide the wheel opening of JP patent no. 07217310A with a plurality of fingers as taught by Gehrke since the plurality of fingers allows the axle to be more easily attached and removed without damaging the axle or structure mounted thereto.

Applicant's arguments with respect to claims 2-4, 6-8, 10-13, 15, 16, 18, and 21-23 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jerry Redman whose telephone number is 571-272-6835. The examiner can normally be reached on M-F from 8 to 6.
